

Construction Sand

greater vancouver
aggregates division

Features and Advantages

All **Lafarge's Construction Sand** is produced from some of the highest quality glacial sand & gravel reserves in the Lower Mainland, by means of washing and vibratory screening. This is done to meet even the most restrictive construction industry specifications and monitored under our Quality Assurance Program.

Both feed stock and finished sand are produced through our modern Sand Processing Wash Plants using the latest industrial sand processing technology. The result is an environmentally clean sand with a consistent and uniform particle size distribution, superior to most common or local pit sands.

By using **Lafarge's Construction Sand** which meets the Master Municipal Construction Document Specification you can produce a clean inexpensive base. Due to our blending process

this free draining sand has excellent compaction characteristics.

When using **Lafarge's Construction Sand** you are supporting a BC produced product that is available to meet your commercial, industrial and residential construction or production needs year-round. Our clean, non-leaching, environmentally sound products are available, delivered to you by truck or they can be shipped to your project site by barge using the Fraser River Waterways System.

Lafarge's Construction Sand can be used as backfill, trench fill, under slab, behind retaining walls or anywhere your project requires a clean, compactable free draining material. For additional information or to place an order, please call our Aggregates Dispatch Office.

Particle Size Analysis

Typical Values - Data shown here is accurate and reliable, but not a specification.
- Typical, means average percent passing on individual sieve.

Sieves (ASTM)	MMCD 2.4 Pit Run Sand	LAFARGE Construction Sand
19 mm	100	
12.5 mm		100%
9.5 mm		
4.75 mm	35-100	95%
2.36 mm	20-70	68%
1.18 mm	13-50	36%
600 µm	8-35	18%
300 µm	5-25	9%
150 µm	2-15	5%
75 µm	0-6	3%

Product Code: AG4807

Material Location:

Coquitlam Leeder Avenue
