

Pea Gravel

greater vancouver
aggregates division

Features and Advantages

Pea Gravel refers to gravel that comprises of small round smooth stones and gets its name because it is comparable in size to that of a Green Pea. **Lafarge Aggregates Division Pea Gravel** is produced from some of the highest quality glacial open pit reserves, by means of washing and vibratory screening. This is done to exceed the most restrictive ready mix specifications and is monitored under our CSA Designated Laboratory Quality Assurance Program. The result is an environmentally clean aggregate with a consistent and uniform particle size distribution, superior to most common or local pits.

By using **Lafarge's Pea Gravel** which exceeds the Canadian Standards Association for Ready Mix Concrete you can produce a high quality exposed aggregate ready mix blend that meets the specific strengths for Mpa and durability, while achieving a beautiful consistent finish.

Lafarge's Pea Gravel is frequently used in ornamental & decorative landscape applications, around stepping stones, walkways and many other hardscape materials. It is also used in aquariums, artificial fountains, playgrounds, around swimming pool decks and to accent garden beds, where it is not only looks good, it aids in the drainage. For pet lovers, it is often used in dog runs and as a kennel floor covering because of its smooth surfaces.

When using **Lafarge's Pea Gravel** you are supporting a BC product that is available to meet your commercial, industrial or residential landscaping or construction needs year-round. Our Pea Gravel is available in bulk at our Coquitlam Leeder Avenue Aggregates Depots. Delivery to your project can be arranged by truck by calling our *Aggregates Dispatch & Order Desk*.

- Typical Values**
- Data shown here is accurate and reliable, but not a specification.
 - Typical, means average percent passing on individual sieve.
 - Gradation may vary slightly from Lafarge Pit to Pit.

Sieves (ASTM)	Lafarge Pea Gravel Spec.	Lafarge Concrete Stone Spec.
16.00mm (5/8")	85-100%	90-100%
12.50mm (1/2")	15-85%	
9.5mm (3/8")	0-15%	45-95%
5.00mm (#4)	0-5%	0-15%
2.50mm (#8)		0-3%
80µm (#200)	0-3%	0-2%
