

Stucco Sand

greater vancouver
aggregates division

Features and Advantages

All **Lafarge's Stucco Sand** is produced from some of the highest quality glacial open pit mining sand reserves in the Lower Mainland, by means of washing and vibratory screening. This is done to meet even the most restrictive specification of the British Columbia Building Code under our Quality Assurance Program.

Both feed stock and finished sand are produced through our modern Sand Processing Wash Plants using the latest industrial processing technology. The result is an environmentally clean sand with a consistent and uniform particle size distribution, superior to most common or local pit sands.

By using **Lafarge's Stucco Sand** you will produce a high quality stucco product that can be evenly applied, produce the

strengths required and will have a consistent finish. Lafarge Aggregates Division knows the importance of sand to cement ratio... it requires a quality sand. By using **Lafarge's Stucco Sand** you are supporting a BC produced product that is available to meet your commercial, industrial or residential construction and production needs year-round. Our clean, non-leaching, environmentally sound stucco sand products are available at most of our Depots and Pits

Delivery to your project site can be arranged by ordering your requirements through our Aggregate Dispatch Office.

Particle Size Analysis

Typical Values

- Data shown here is accurate and reliable, but not a specification.
- Typical, means average percent passing on individual sieve.
- Sieve Analysis Tested to CSA A23.2-2A

Sieves (ASTM)	B.C. Building Code Specification	2.00mm Stucco Sand
4.00 mm (#5)	100%	100%
2.00 mm (#10)	90-100%	98%
1.00 mm (#18)	60-90%	85%
500 µm (#35)	45-60%	55%
250 µm (#60)	10-30%	15%
125 µm (#120)	0-5%	3%

Material Location:
