

Volleyball Sand

When you have your head-up and into the game... It's comforting to have confidence in the sand under your feet.

Lafarge's Coquitlam Sand & Gravel Volleyball Sand offers equivalent performance for your playing enjoyment. Our clean uniformly graded, free draining sand resists compaction and requires minimal maintenance. Our sand is currently being played on at the Coquitlam Rotary Centennial Volleyball Courts, Langley Event Centre Courts and The Sandbox in Richmond.

Volleyball Sand Specifications, Features and Advantages

Product Description:

- Environmental clean water-washed sand, free of silt and clay.
- Consistent and uniform particle sizing that resists crusting.
- Resists compaction and remains playable in variable weather.
- Provides exceptional drainage characteristics.
- Light tan in colour and sub-angular in shape.

Typical Size:

- 0.3 to 1.25 mm

Performance:

- Low compaction reduces impact on players.
- Ideal for many other surfaces. (Beaches, Picnic & Play Areas)

Maintenance:

- Low, easy maintenance; simply rake to refresh & restore.

Non-Calcareous:

- Calcium free sand, superior to most common or local pit sands.
