

## Winter Sand

greater vancouver  
aggregates division

### Features and Advantages

All *Lafarge Aggregates Division Winter Sand* or Abrasive as it is often referenced, is produced from some of the highest quality glacial open pit mining reserves in the Lower Mainland, by means of washing and vibratory screening. This is done to meet the most restrictive Preventive Maintenance Services requirements within the Maintenance Standards or Specifications for Winter Abrasives as required on our Highways to restore surface conditions. All this is done under our internal Quality Assurance Program.

Both feed stock and finished sands are produced through our modern Sand Processing Wash Plants using the latest industrial processing technology. The result is an environmentally clean sand with a consistent and uniform particle size distribution, superior to most common or local pit sands.

By using *Lafarge's Winter Sand* which meets the BC-MoTI Class A gradation you can help restore surface traction &/or prevent slippery surface conditions. When using *Lafarge's Winter Sand* you are supporting a BC produced product that is available to meet your maintenance services. Our clean, non-leaching, environmentally sound Winter Sand product is available at all of our Pits and Depots. Delivery by truck to your yard or project can be arranged by calling our Aggregates Dispatch

**Road Deicing Salt:** Should Bulk or Packaged Highway Road Deicing Salt be required or specified to melt packed snow or ice... please contact our Lafarge Asphalt Technologies Group at 604.521.7707... formerly *McTar Petroleum*.

### Particle Size Analysis

Typical Values - Data shown here is accurate and reliable, but not a specification.  
- Typical, means average percent passing on individual sieve.

Sieves (ASTM)	BC-MoTI Winter Sand Specs Cl A & B
12.50mm	100%
9.00mm	-
4.75mm (#4)	50-95%
2.36mm (#8)	30-80%
1.25mm (#16)	-
600µm (#30)	10-50%
300µm (#50)	0-25%
075µm (#200)	0-6%

Product Code: AG4807- 006
